

## **Tidal Showcases Application Performance Management for NetWeaver at SAP TechEd '07, Booth #79**

### *Features Solutions that Simplify Management of SOA-based Apps*

**PALO ALTO, Calif.**, September 28, 2007---Tidal Software™, a leading provider of application scheduling and performance management software, today announced that it is featuring the newest release of its solution for simplified monitoring and management of NetWeaver™ at SAP® TechEd, Booth #79. Tidal will also feature a user presentation presented by John Hamm, Manager IT of Enterprise Systems Business Applications at Lyondell, titled “SAP Performance Management - The Journey from Reactive to Proactive: A Case Study.” The customer presentation is on Wednesday, October 3<sup>rd</sup> at 10:30 AM in Lagoon A, Level 2.

Tidal Software’s solution features low-overhead, easy-to-use products including Tidal™ Horizon™ for SAP Solutions, Tidal Transaction Analyzer for SAP Solutions, Tidal Intersperse™, and Tidal Enterprise Scheduler. Tidal’s products:

- Reduce the time and complexity of providing meaningful transaction data, trending and analysis
- Increase visibility into critical business processes
- Diagnose and resolve dialogue response time issues
- Extend the capabilities of SAP Solution Manager to reduce response times up to 90%
- Provide visibility into NetWeaver

In addition to simplifying performance management for traditional SAP solutions, Tidal also simplifies management of SOA deployments on NetWeaver by providing deep, real-time visibility into trouble spots. Tidal Intersperse is unique in its ability to monitor specific business transactions end-to-end across JVMs, allowing it to trace a business process across servers – which is becoming increasingly common as SOA applications embrace more of the enterprise business processes.

For additional information on Tidal Software or a demonstration of its products, please visit Booth #79.

## About Tidal Software

Tidal Software is a leading provider of application scheduling and performance management software that radically simplifies IT operations by automating and integrating performance and process management. Tidal's solution puts IT operations management into the business process using new levels of automation, visibility, and control over systems. Tidal makes applications such as SAP®, PeopleSoft®, and Oracle E-business Suite™ more efficient, reliable, and secure to return greater business value. Tidal also gives IT deep visibility into and precise control over new SOA-based composite solutions consisting of packaged applications and custom components in Java and .NET. General Mills, HP, ING Direct, Microsoft, and T-Mobile are among the Tidal customers who use Tidal to reduce operational costs by running IT at higher efficiency rates and containing overall data center footprints. Privately held, Tidal is venture-backed by Kleiner Perkins Caufield & Byers, Novus Ventures, Panorama Capital, and VantagePoint Venture Partners. For more information, contact Tidal Software at (650) 475-4600 or visit [www.tidalsoftware.com](http://www.tidalsoftware.com).
