

Tidal® Enterprise Scheduler Adapter for Use with SAP® BusinessObjects™ XI Receives SAP Certification

Through certified integration, users can define, launch, and monitor tasks within an SAP BusinessObjects solution-based environment using the Tidal solution

ORLANDO, Fla. – May 11, 2009 – Tidal Software, a leading provider of application scheduling and performance management software, today announced that the Tidal Enterprise Scheduler Adapter version 5.3 has been certified by SAP as the interface between Tidal Enterprise Scheduler and the SAP® BusinessObjects™ XI solutions and SAP BusinessObjects Data Services based on the SAP BusinessObjects XI SDK. Users can define, launch, and monitor tasks within an SAP BusinessObjects solution-based environment using the Tidal solution.

The SAP Integration and Certification Center has certified the integration between the Tidal Enterprise Scheduler and the SAP Business Objects XI and Data Services API. With SAP BusinessObjects solutions, companies can establish an intelligence platform that provides immediate access to trusted business information.

“Without effective process automation, data does not arrive at the right place at the right time,” said Wayne Greene, Tidal’s vice president of product management. “With too many ‘moving parts,’ data pathways can break, and poor visibility can make it difficult to see where bottlenecks exist. In addition, when process integration between ETL and reporting functionality is less than optimal, business operations can be negatively impacted.”

Tidal, an SAP software solution partner, is a member of the SAP PartnerEdge™ program. Through the program, partners work closely with SAP to develop and certify the technical integration of their solutions with SAP software. Integrated partner applications extend, complement and add value to SAP solutions, thereby helping mutual customers more successfully meet business needs and drive strong results. Tidal is one of the only scheduler vendors offering a unique approach to integrate its scheduling software with SAP BusinessObjects XI.

Features of Tidal Enterprise Adapter include the following:

- Supports cross-application, cross-platform job dependencies, enabling integration of SAP BusinessObjects XI, SAP BusinessObjects Data Services, SAP BusinessObjects Web Intelligence® software, and Crystal Report® software with all other data flows
- Offers a single point-of-control for companywide job scheduling through a Windows or web console
- Leverages existing technology and investment in SAP BusinessObjects solutions for a complete enterprise solution
- Delivers industry-leading scheduling functionality, including GUI job definition and seamless handling of events, dependencies, resources, calendars, and output
- Provides exception-based management, scalability, role-based security, and enhanced manageability
- Eliminates scripting or command lines, dramatically reducing maintenance requirements and increasing ROI

Today's announcement was made at SAPPHERE® 2009, being held here May 11-14, where Tidal Software is exhibiting in booth 557.

About Tidal Software

Tidal Software is a leading provider of application scheduling and performance management software that radically simplifies IT operations by automating and integrating performance and process management. Tidal's solution puts IT operations management into the business process using new levels of automation, visibility, and control over systems. Tidal's solutions support applications from vendors such as SAP AG, PeopleSoft, and Oracle, helping make them more efficient, reliable, and secure to return greater business value to customers. Tidal also gives IT deep visibility into and precise control over new SOA-based composite solutions consisting of packaged applications and custom components in Microsoft .NET and Java. General Mills, HP, ING Direct, Microsoft, and T-Mobile are among the Tidal customers who use Tidal to reduce operational costs by running IT at higher efficiency rates and containing overall data center footprints. Privately held, Tidal is venture-backed by Kleiner Perkins Caufield & Byers, Novus Ventures, Panorama Capital, and VantagePoint Venture Partners. For more information, contact Tidal Software at (650) 475-4600 or visit www.tidalsoftware.com.
