

Tidal Software is now
part of Cisco.

Product Announcement

PALO ALTO, California – November, 2009 – The newest release of Tidal Intersperse—version 8.0.2—is now generally available. This new version provides several enhancements, many that are a direct result of user requests. Major enhancements in Tidal Intersperse Version 8.0.2 include:

- ~ Extended support for memory leak detection and analysis
- ~ Additional template support covering alerts with e-mail and SNMP actions, as well as log event alert triggers
- ~ More detailed alert e-mail messages
- ~ A SSL-secured agent-manager data path option
- ~ Console usability enhancements for login, dashboards, alert editing and event retrieval
- ~ Streamlined agent installation with greater automation

This release includes and supercedes all patch fixes delivered since the GA of version 8.0. For details on obtaining the new release, please contact Cisco Tidal Technical Services by sending an email to support@tidalsoft.com with the subject line: Intersperse.

Please note that as of May 1st, 2010 Cisco Systems will discontinue support for version 7.x of Intersperse.
